1. Brief Introduction & History

The company ING. RICHARD ZEHETBAUER is located in the region of Viennese Forest in the South of Vienna. The family owned enterprise is perceived as of the most developed players in the field of manufacturing of premium furniture over more than 50 years.

Since the beginning of the 1960s we have been producing high-quality furniture with full of passion. Due to collected experience over the last decades, consequent development and continuous investment we could maintain the high level of craftsmanship.

Persistent growth has been generated by the capability of its masters and huge know-how among its team.

The permanent integration of the latest standards of technical achievements into the work processes contributes to the success of the company today and in future.

Few historical milestones:

- 1961 Franz Zehetbauer established workshop and manufactory and started producing its first furniture with two craftsmen.
- 1987 His son, Richard, graduated from engineering high school and took over the family owned business. Many adaptations in terms of modernization of the work processes took place.
- 1998 Enlargement of the production facilities, extension of the space of the workshops and architectural offices.
- 2000 Construction of own in-house sawmill ensuring the best natural raw timber for its in-house production.
- 2006 Investment in ultra-modern CNC equipment for further optimization of the production line
- 2007 Construction of new planning office
- 2010 and 2015 further enlargement of solid wood processing

2. Philosophy & Craftsmanship

The philosophy is based on individuality of the design and the handmade quality of the finished product. The range of products and services is related unquestionably to the master class of manufacturing furniture and construction elements.

During the 50 year consecutively production of high-end furniture the company has paid tribute and attention to the qualification of its masters and therefore gathered huge know-how and intelligence of fine joinery.

The skills and experience of its actual 6 masters of joinery always handed over their knowledge and even secrets of this craft. Numerous young people went through this practise and achieved high level of work which is the basic equipment for the company's future.

Actually 6 masters are directing and controlling all different stages of the in-houses processes with a total of 20 workers in the fields of production and assembling.

The Master's Signature

It is obvious that all components of the production, particularly the origin of all raw materials, the creative design, the finishing of the specific piece of furniture and finally the assembling process are fully under the control of the owner of the company.

This is the company's success and gives the signature of its works which are appreciated by numerous of satisfied international clients.
